

Felixstowe Museum Grant application to purchase a Large Format/Poster printer.

Grant given £ 900.00. Cost of printer £897.26

We purchased the printer from Curry's and received it in August 2023.

We have been able to print a number of displays and posters for the Museum and for our sister organisation, Landguard Nature Reserve. Some examples are shown below.

We have now installed high speed Broadband at the Museum and the printer will therefore have greater utility going forward.

We are looking forward to several events this year and our ability to advertise them with high-quality posters will be a great bonus and will help us to appeal to a wider audience.

We have made considerable savings as a result of being able to print in-house and are currently working on larger format displays for the visibly impaired which will enhance our offer for the upcoming season.

We are very grateful for the support of Felixstowe Town Council with this grant.
