

Civic & Community Committee 17 June 2015 – Appendix C

Felixstowe Town CCTV Police report: January 2015- March 2015.

This is the second quarterly report for the Felixstowe CCTV project and is intended to give a brief summary of the volume and type of crimes and incidents that the Police deal with in the areas covered by the existing CCTV cameras.

The following spreadsheet lists the incidents and details in five columns.

- Column A lists the location of the incident
- Column B lists the date of the incident
- Column C lists the Police crime or incident number
- Column D lists a description of the Crime or incident (RTC) stands for Road Traffic Collision
- Column E indicates by an asterisk if a suspect has been identified if relevant.

As you will see, there is a fairly broad range of incidents that have occurred in these areas and I have not included every type of incident such as littering or parking offences, but I have chosen the type of incidents that the CCTV evidence is generally used.

In some of the investigations the CCTV images have been the only reason a suspect was identified. In other incidents the images have supplemented and assisted in corroborating witness or Police Officer evidence.

When we have a CCTV operator on duty the CCTV can be used to alert Police to incidents or monitor groups of people leaving the licenced venues on the sea front for example.

During this quarter I have calculated that the CCTV volunteers have given 131 hrs of their time in monitoring and operating the cameras. The majority of the hours were between 2200hrs and 0300hrs at weekends to cover the Night Time Economy periods.

A number of Police Officers are also trained in downloading images from the system to a suitable disc exhibit for evidential purposes.

We are currently recruiting 4 additional volunteers who are currently going through induction training and will be joining the existing team.

We are keeping records of when a fault is reported to the contactors STC, and when these are repaired. The contractors have recently replaced a significant number of high cost components and this has dramatically improved the performance of the equipment. In the tail end and early part of this year there had been a number of technical failures resulting in the CCTV being less effective and numerous repair call

outs, however the system has been sound and robust since the replacement programme undertaken by them.

I hope you find the report of some use in determining the value and effectiveness of the system. I welcome any feedback or suggestions on alterations to the report for future quarters.

PS 733 Peter Street
