

Felixstowe Museum has developed a Children's area with the money given by the council, over easter this will be used for easter themed crafts, we will then continue to develop this offer with the items purchased with our grant money including children's indoor and outdoor activities. These allow children to engage in history in a new way making the heritage of the town more accessible to them.

Our volunteers were able to work on a number of these projects including construction of the purchased materials as well as coming up with themed activities. We still hope to work with other local community groups on this project. Our volunteers enjoyed working on this project and it will be good to see them interact with our younger visitors.

We are really keen to continue to develop our children's offering as they make up an important section of our audience. We are looking forward to our opening season to see the area in use.

This helps supports the museums aim of continuing to grow as an attraction for Felixstowe as well as telling the story of Felixstowe. By increasing our family offering we hope to increase our visitor numbers as well as secondary spend.
