

KINGSFLEET SCHOOL ASSOCIATION

PLAYGROUND PROJECT

Following being awarded a grant from Felixstowe Town Council to improve an area of the playground, the school agreed to fund a canopy. This has been completed.

We are currently procuring the painting of the wall under the windows which also requires some repair to the render. Once this is complete, we will purchase new benches to go around the wall. We are currently look at the best type to ensure they require little maintenance and are durable.

We will also be using benches elsewhere in the school in the area and the children have begun some planting up some pots to go in the area. We have decided to look at sustainable planting rather than bedding plants, so have gone with rockery type plants and succulents which require less water and will last all year round. We also hope to install some large planters in the medium term which will be using captured rain water.
