

The Council's occasional grant has helped to fund a complete revitalisation of our timeline room. This has been a large undertaking in terms of evaluating the history and the story of the fort. Our Fort Forward Team have worked tirelessly to review all of the material and have worked closely with Maltings on the design.

The construction of the room has been ongoing and supported by our volunteer maintenance team. This has been an excellent project for them and really supported this team in terms of being a social joint project that has let them use and learn skills. We got feedback from Maltings saying that this one one of the best constructions they had seen even compared to paid projects. This demonstrates the care and time our volunteers put into making it as best as possible.

The room will be launching soon and we are excited to see what our visitors think of this vastly improved space. It will be an excellent example of the quality of displays we want to give our visitors which will continue to grow our profile as a leading tourist attraction in Felixstowe. We are very appreciative of the town councils support as it allows us to continue to tell our local history.
